

**REMARKS**

Following the filing of the above referenced application, Applicants noted that three original sheets of figures were omitted from the above referenced U.S. Patent Application. The application, without any drawings, was filed in the United States Patent and Trademark Office on July 24, 2003. The text of the specification, however, includes a detailed description of multi-layered structures, including reference numbers, for the invention. Specifically, Fig. 1A is described beginning at page 12, Fig. 1B is described beginning at page 22, Fig. 2A is described beginning at page 23, Fig. 2B is described beginning at page 24 and Fig. 2C is also described at page 24. Fig. 3 is described at page 36. particularly with reference to other figures at page 37. Because of the simplicity of the figures and the description in the specification, Applicants respectfully submit that the content of Figs. 1A, 1B and 2A-2C and 3 should be admitted.

Applicant notes that the only number included in the figures and not in the original specification is the number "6." Applicant is prepared to delete reference number 6, if required by the Examiner. Entry and consideration of this Amendment are respectfully requested.

Respectfully submitted,
